Public health sector must get proactive about lobbying for change

The planet is in trouble and radical shifts in policies must be effected

Opinion

"We continue to tamper with the very fabric of life and all that sustains us is under increasing stress."

The public health sector must get proactive about lobbying for change because the planet is in trouble and radical shifts in policies are necessary. The ability of the ecosystem to support and sustain life is at risk due to severe and unpredictable violent weather, such as hurricanes and drought. The stress on the environment is increasing, and the public health sector must adapt.

Colin L. Sokolne

"An ounce of prevention is worth a pound of cure." Better safe than sorry are proverbs that unify and define the public health movement. Think about how we will be able to live on a planet that is experiencing a global health crisis. The public health sector must be proactive in lobbying for change because the planet is in trouble. The ability of the ecosystem to support and sustain life is at risk due to severe and unpredictable violent weather, such as hurricanes and drought. The stress on the environment is increasing, and the public health sector must adapt.
